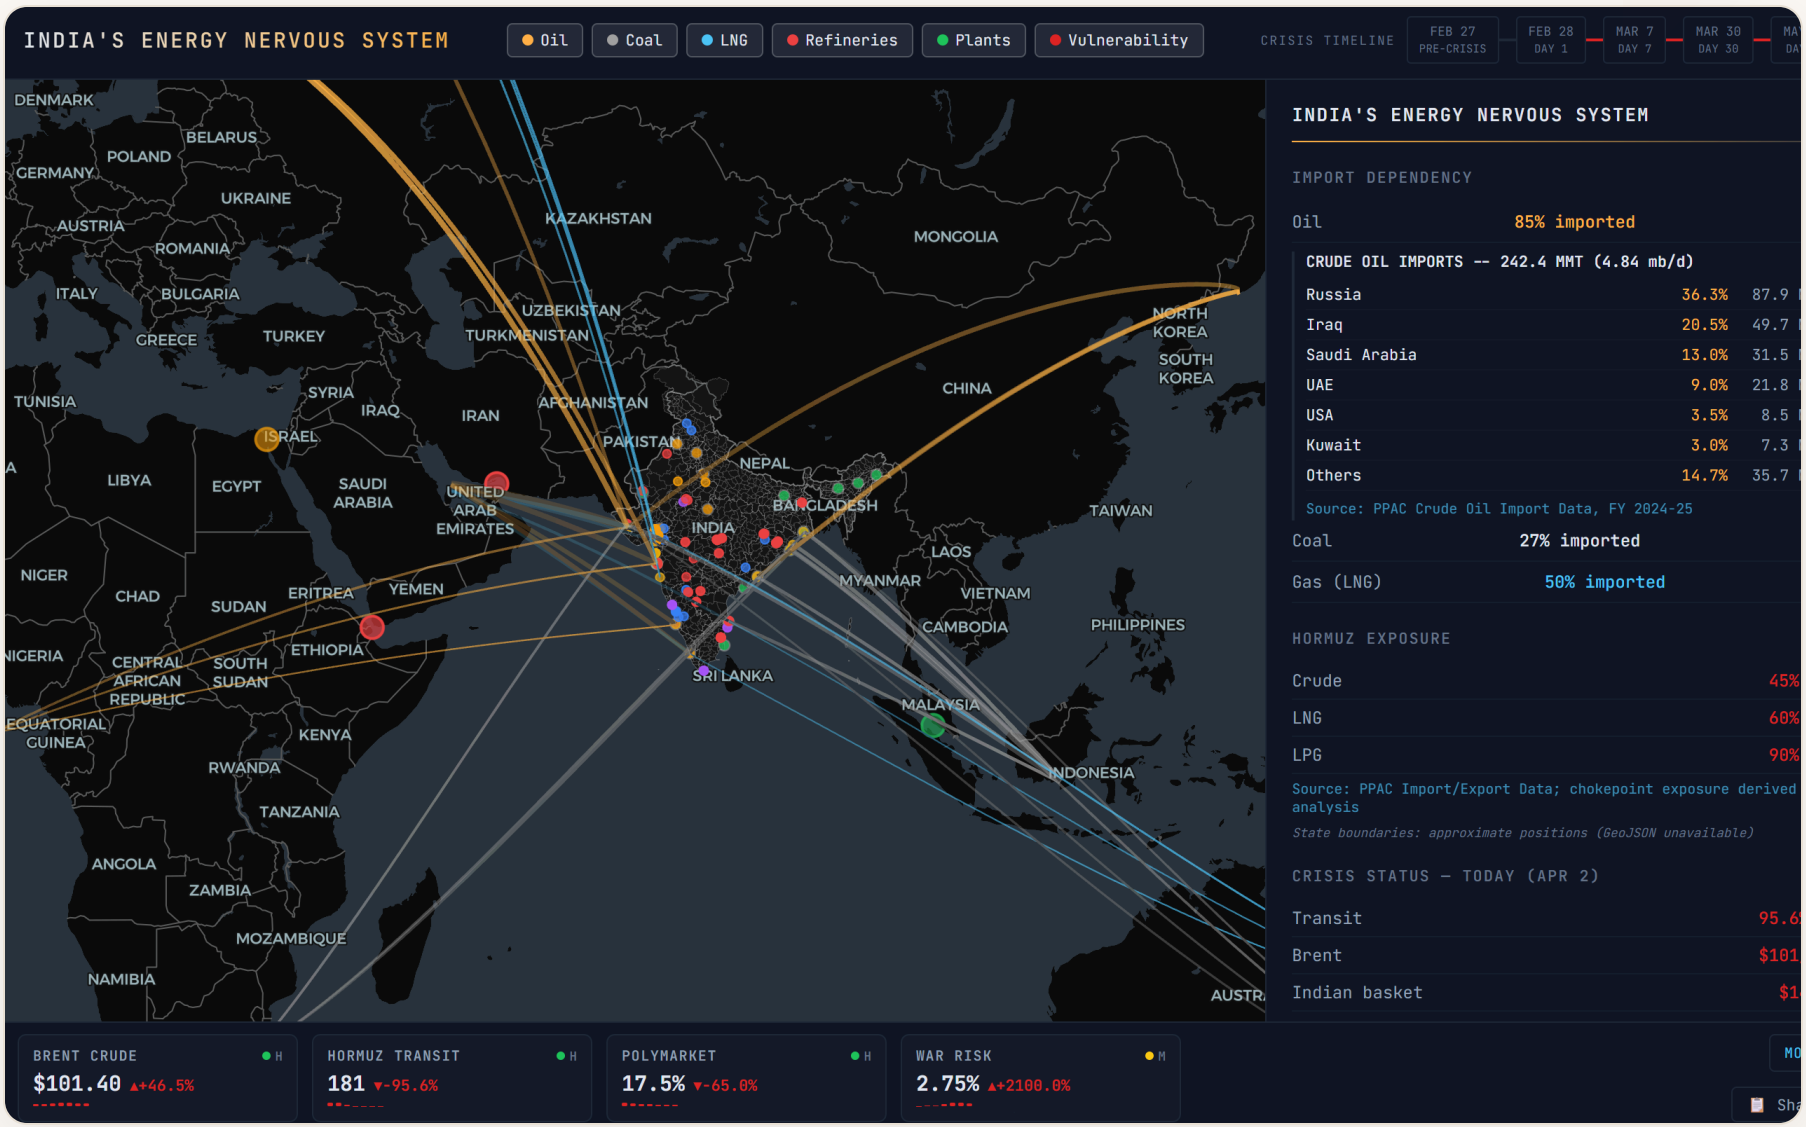
LIVE DASHBOARD

India's Energy Nervous System



39 trade routes · 23 refineries · 123 power plants · Every number sourced

avyayalaya.github.io/india-energy

THE DEPENDENCY

85% of India's oil is imported. 45% transits through a 54km strait.

242 **MMT** crude imported annually	4.84 **mb/d** consumed daily	45% Crude via **Hormuz**
60% LNG via **Hormuz**	90% LPG via **Hormuz**	54km Strait width at **narrowest**

Source: PPAC, EIA

THE CRISIS

95.6% transit collapse.

Feb 28, 2026 — Strait of Hormuz closure

BEFORE	AFTER
4,140	181
transits / month	transits / month

$63	$147	+133%
Indian basket before	Indian basket after	Price surge in 8 weeks

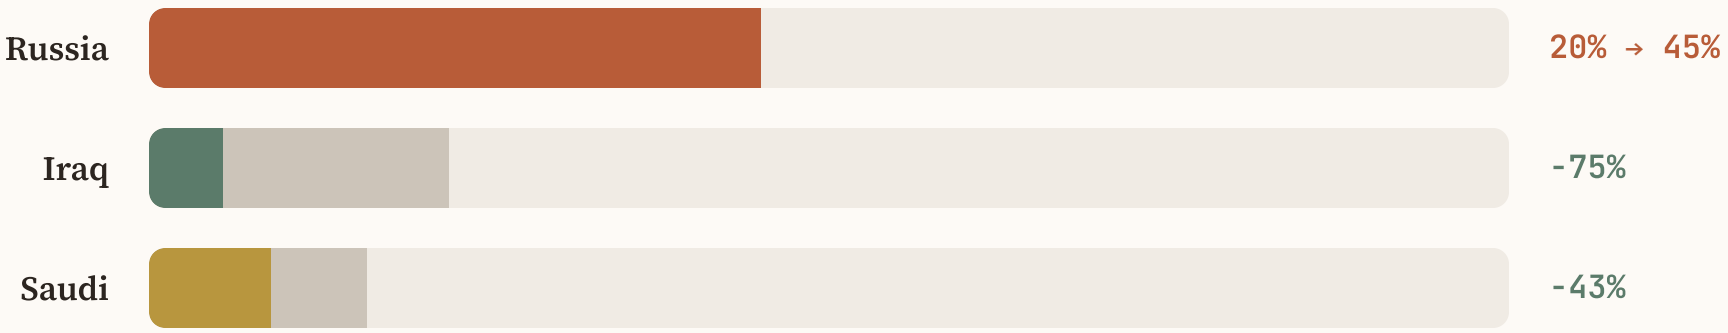
THE ADAPTATION

Supply map rewired in one month.



"Insurance closed the strait before missiles did."

War risk: 0.125% → 3.0%

Source: PPAC, Lloyd's List

THE VULNERABILITY

One geography. One gap.

GUJARAT CONCENTRATION

34%

of national refining capacity

60%

of LNG terminals

Single-point-of-failure geography.

STRATEGIC RESERVE

9.5

days of coverage at current consumption

64%

SPR capacity filled

9.5 days — IEA minimum: 90 days
